OLA KEY INSIGHTS

Key Insights from the OLA Cabs Report (Overall)

- 1 Booking Status Performance**
>62% of bookings are successful, which is a strong completion rate.
>38% of rides do not complete
- 2 Most Popular Vehicle Types by Distance**
>Differences are small, but **Prime Sedan leads slightly**, suggesting strong
>customer preference for more comfortable travel. **eBike** and **Bike** also perform strongly, showing demand for cheaper, quick urban travel.
- 3 Ride Distance Trend Over Days**
>Daily ride distances remain largely stable between 46K to 49K, meaning consistent demand.
>A peak occurs on Day 30 (51K) — possibly weekend or festival-related spike.

No significant downward trend, showing steady usage throughout the month.

★ **Overall Summary**
High trip success rate, but cancellations (especially by drivers) offer room for improvement.
Prime Sedan is the preferred vehicle option, but 2-wheelers are also widely used, showing a mix of premium and budget users.

Key Insights – Vehicle Type Analysis

- 1 Prime Sedan Generates the Highest Revenue**
>Prime Sedan has the highest total booking value (₹82.98 lakh).and highest successful booking revenue (₹52.24 lakh).
>This indicates that customers strongly prefer premium comfort services, and these rides also convert well.
- 2 Revenue is Balanced Across Most Premium Car Categories**
Suggests that Ola has a healthy distribution of demand across higher-end four-wheelers.
- 3 Auto Has the Lowest Trip Distance**
Indicates that autos are mainly used for short, hyperlocal city travel.
- 4 2-Wheelers Show Strong Performance**
Shows strong demand for quick, affordable, last-mile travel, especially in high-traffic cities.

★ **Overall Takeaways**
Premium car services (Prime Sedan/SUV/Plus) lead revenue, confirming customer willingness to pay for comfort.
Autos dominate short-distance trips, while bikes and e-bikes strengthen affordable mobility.

Ola has a well-balanced revenue and usage distribution, reducing dependency on a single vehicle category.

Here are the key insights from the cancellation report:

- 1 Customer-Side Cancellation Reasons**
>Customers often cancel due to service quality issues indicating improvement opportunities in app navigation and driver engagement.
- 2 Driver-Side Cancellation Reasons**
>Drivers are more likely to cancel due to concerns with passengers’ health, compliance (extra passengers), or personal issues, highlighting operational and perception challenges.

★ **Overall Summary**
>Customers cancel mainly due to poor experience (driver delays, AC issues, or wrong address).
>Drivers cancel mainly due to customer behavior or safety concerns.

Improving service reliability, navigation accuracy, can significantly reduce cancellations.

OLA KEY INSIGHTS

Revenue – Key Insights

1 Top Revenue-Generating Locations

> Peenya, Mysore Road, Vijayanagar, Shantinagar, and Magadi Road are the top 5 locations, each generating around ₹1 million in booking value.

> These areas appear to be high-demand zones with strong ride frequency and revenue contribution.

2 Lowest Revenue Locations

> Chickpet, Richmond Town, Electronic City, Ramamurthy Nagar, and Whitefield fall in the bottom 5 locations, each with slightly lower total revenue.

> This may indicate: Lower ride demand, Shorter trip distances, or more competition or alternative transport coverage.

3 High-Value Customers

> The highest customer (ID: CID785112) contributes ₹8,000 in booking value, while others range between ₹6,000–₹6,300.

> A small segment of customers contributes a noticeable share of revenue, showing repeat premium usage and loyal customer behavior.

4 Payment Method Insights

"Cash" is the highest category at ₹1.9 Cr, and Debit card is the lowest category at ₹3.38 Lakh.

Summary

> Revenue is concentrated in a few major city zones like Peenya and Mysore Road.

> Cash and UPI remain the preferred payment modes, while cards are rarely used.

> A small group of customers contribute a large share of revenue, indicating strong repeat usage.

Key Insights – Customer & Driver Ratings

1 Ratings Are Consistent Across Vehicle Types

Most vehicle categories have average ratings around 4.0, from both customers and drivers.

2 Prime Plus Slightly Leads in Customer Ratings

Prime Plus has the highest customer rating at 4.01, indicating a slightly better customer experience compared to others.

3 Bikes & E-Bikes Have Lower Customer Ratings

Possible reasons: Comfort limitations, Weather conditions, Shorter and more transactional ride nature

4 Drivers Rate Some Categories Slightly Differently

> E-Bike drivers rate customers highest (4.01).

> Bike drivers give the lowest driver perspective rating (3.98), suggesting:

5 No Major Satisfaction Gaps

The difference between customer and driver ratings is minimal across every vehicle type.

Ratings Dashboard Summary

> Overall ratings are consistent across vehicle categories, averaging around 4.0 for both customers and drivers.

> Prime Plus leads in customer satisfaction (4.01), showing slightly higher service quality perception.

> Bikes and E-Bikes have marginally lower customer ratings (3.99), likely due to comfort and ride conditions.

> E-Bike drivers give the highest ratings to customers (4.01), while Bike drivers rate lowest (3.98).

> Minimal rating gaps between customers and drivers, indicating stable and mutually satisfactory service experience across the board.
